

default settings - trees, foliage and grass

“Default Settings” are the starting point colours I use to give me, well, a starting point. These default sets of colours really help me to get some momentum when things are a little difficult starting a painting. Then I can simply adjust the colours from there if need be. In this example Dioxazine Purple and Cadmium Yellow Medium are referenced as the “warm colours”, whereas Forest Green is “cool”.

- Mark W.

Check out our [Youtube channel](#) for more great tutorials, or [click here](#) for Mark's how to paint DVDs.

Use more Forest Green (cool) and less Dioxazine Purple/Cadmium Yellow Medium (warms).

Use Less Forest Green (cool) and more Dioxazine Purple/Cadmium Yellow Medium (warms).
